

Instruments and Mounting Kits

Modular design allows the instrument to be mounted three different ways using mounting kits

Direct Mounting to Flow Sensor

Direct Mounting Kit

F3.01 Flow Sensor (Hall or Coil Effect)

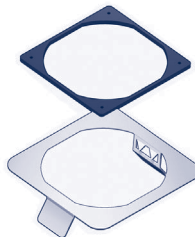

Direct Mounted Flow Instrument

Direct Mount package consists of a flow instrument, flow sensor and direct mounting kit.

The **K9.KC1** kit includes an ABS enclosure with EPDM gasket for NEMA 4, 4X watertight installation, a cap and locking ring for connecting the sensor to the enclosure, plus four screws to attach the instrument.

Panel Mounting

Panel Mounting Kit

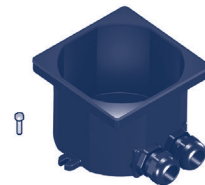

Panel Mount Flow Instrument

Panel Mount instrument consists of a flow instrument and the panel mounting kit.

The **K9.KP1** kit includes a metal mounting clip and a neoprene gasket for NEMA 4, 4X watertight installation. The monitor fits a standard 1/4 DIN (96 mm x 96 mm or 3.78" x 3.78") panel cutout.

Wall Mounting

Wall Mounting Kit

Wall Mount Flow Instrument

Wall Mount instrument consists of a flow instrument and the wall mounting kit.

The **F9.KW1** kit includes an ABS plastic NEMA 4, 4X surface mount enclosure, EPDM gasket for NEMA 4, 4X watertight installation, plus screws for attaching the instrument.

The **F9.KW2** includes in addition a 110/230 VAC to 24 VDC power supply mounted inside the ABS enclosure to provide a regulated low voltage to the flow monitor.
