NEW Product Offering

The New GasAlertMax XT: The simple solution to your safety puzzle.

BW Technologies by Honeywell announces the arrival of the durable GasAlertMax XT, a portable multi-gas detector featuring a built-in motorized pump, simple and reliable one-button operation and a variety of user-definable options. Monitor up to four gas hazards including H₂S, CO, O₂ and combustibles (%LEL). The GasAlertMax XT's flexibility, ease-of use and performance are perfectly suited to confined space entry and a wide range of applications. The GasAlertMax XT four-gas detector offers exceptional value with a low cost of ownership. Features include:

- Integrated sampling pump
- SmartSample technology and powerful diaphragm pump provide reliable block detection and consistent, uniform flow
- Easy-to-read, LCD for simultaneous displays all four gases (H₂S, CO, O₂ and combustibles)
- Visual, vibrating and audible alarm indicators
- Low, High, TWA (time weighted average) and STEL (short-term exposure limit) alarms
- Simple auto-calibration procedure
- Rechargeable batteries provide enough power for a 13-hour shift
- Best in class block detection with semi-conductor pressure sensor
- Easy, one-button interface for simple operation
- Compatible with MicroDock II automated test and calibration system

In addition to quality test, calibration and repair of BWT Gas Detectors, Marsh can provide the complete range of new BWT products with a competitive price and delivery, *allowing you a single source for your gas detection sales, service and calibration needs.* We welcome your inquiries for your BW Technologies Product and Service requirement, and look forward to being of continued service to you in the future.
