NUCLEAR NEWSLETTER

Volume 2010-01

Marsh Instrumentation Ltd. is pleased to provide our Nuclear Customers and prospects with information we hope you will find of interest and help you in your daily operations and duties.

IPM-4 New Product Release:

Marsh has been providing **Ice Plug Monitoring Systems** to the Nuclear Industry for many years and IPM family continues to expand with the IPM-4 Series, now in production and available in two configurations, as shown in the photo. Continuous 24/7 monitoring, full data & video analysis and multiple Ice Plug Monitoring capabilities are just some of the expanded features. For more info contact us at nuclearservices@marshinst.com.

Marsh expands Ice Plug Freeze Jacket Sizes:

Marsh **Ice Plug Freeze Jackets** have been specifically designed to meet Nuclear CSA Z299.2 requirements, and continues to evolve in sizes, materials and design options. Sizes are now available from 1/4" to 14" pipe sizes as well as custom sizes for Feeder Pipes. For info visit our website at www.marshinst.com and click on '**Nuclear Services**'.

Ice Plug Training & Test System:

To assist our Nuclear Customers with training, testing and operator qualifications, Marsh's **Canadian Nuclear Services Division** has developed a flexible Ice Plug Training & Test System allowing training on pipe sizes from 1/2" to 14", at multiple angles. Available with leak rate monitoring and numerous control features. For more info: nuclearproducts@marshinst.com

Additional CRN's received for Marsh Control & Automation Products:

We are pleased to advise additional CRN's for our **Meriam Accutubes** for Flow Metering and our **Delta Controls Pressure and Temperature Switches** for the Nuclear Power Industry. For more details contact us at products@marshinst.com or click on '**Products**' on our website.
